Profile Summary

Motivated and self-driven fresher with strong foundational knowledge in Python, SQL, Data Analysis, and problem-solving. Passionate about building real-world projects and continuously improving skills. Eager to apply technical knowledge to contribute in data-driven and software development roles.

Education

Bachelor of Engineering (B.E), Information Technology 2022–2026
Anantrao Pawar College Of Engineering Research(APCOER), Pune
CGPA: 8.00/10

Technical Skills

- **Programming:** Python, SQL)
- **Databases:** MySQL, MS SQL Server
- **Data Tools:** Pandas, NumPy
- **Big Data:** PySpark (Beginner), ETL Concepts
- **Web Technologies:** HTML, CSS (Basic)
- **Version Control:** Git, GitHub
- **Cloud (Beginner):**
- **Other:** Excel, Word

Projects

1. Sales Performance Analysis System (Python, SQL)

- Designed and developed a SQL-based analytical system to evaluate monthly and quarterly sales performance. Created complex queries using JOINS, window functions, subqueries, CTEs, and aggregate functions to calculate KPIs such as MoM growth, best-selling products, customer purchase trends, and regional performance.
- Skills Used: SQL, Window Functions, CTEs, Aggregations
- Outcome: Improved insights for decision-making with automated reports.

2. Medibrief – Medical Report Summarization System

- Built a system that extracts text from medical reports (PDFs/images), translates it if needed, and generates a simple, easy-to-understand summary. Included modules for text extraction, translation, processing, and a clean interface for users to upload reports and view results. Designed backend services for handling requests and storing summaries securely.

Strengths

- Strong problem-solving and logical thinking
- Quick learner with consistent self-improvement
- Attention to detail and good communication skills
- Team Oriented and Team Player
